- S/PDIF Outputs
- Analogue stereo
- Ethernet 10/100
- WebRadio
- KiSS PC-Link
- Track name search on audio CDs
- Firmware Upgradable
- 80 GB Hard Disk

DP-508 goes even further on the road of innovation. Like its predecessors, this player reads all standard DVDs, DivX® 3.11, DivX® 4, DivX® 5 files along with XviD, MPEG-4, audio files like MP3 or standard Audio CDs, if connected to a Broadband Internet Connection it will even find the track names after the insertion of a music CD.

JPEG pictures can also be viewed. Its Ethernet capabilities enables the DP-508 to read Audio/Video/Pictures files that are currently located on a PC with PC-Link Software. Providing the user has a Boadband Internet connection Internet Radio with WebRadio can be played.

But, the main new feature of this player resides in the addition of an 80 GB Hard Disk, enabling the user, to store Audio/Video/Picture files. These can be easily downloaded from a CD or from a PC on the DVD Player thanks to PC-Link. Then a User Friendly list Interface permits the user to browse and choose among the stored file. Firmware updates are regularly posted on our web site, adding improvements and new features to the player. The DP-508 also comes complete with the standard CD/MP3, Ogg Vorbis, DivX®, XviD, CD-RW and DVD+-RW playback.

Applications:
- Video Distribution Control for Luxury Homes
- Video Distribution Control at conference rooms in Luxury Offices
- Hotel Banquet Halls Video Distribution Control
- Smart School Video Distribution Control Sharing
