

## Outdoor Speakers

USA Product with Reputation known since 1989, Specialized and designed as an innovative speaker for multi-room audio Home System.

### Awards

All-weather design and performance that will exceed your expectations in an outdoor application From the patio to the pool, on a boat or a bookshelf, Outdoor Speaker Systems deliver the sound you want, anywhere you want it.

These speakers truly do “rock”. The composite woofer contains a high percentage of Mica, a superheated volcanic rock, which reduces resonance and increases stiffness, while keeping the cone stable under temperature extremes. Oversized magnets (more rocks) increase power handling, so your new speakers can rock even harder. Turn up the sound, and enjoy that cookout like never before.

OM650 Outdoor Speakers design delivers a deep, clean bass that compliments the accurate highs and warm mids. Designed to withstand even the harshest weather conditions, O Series speakers will provide years of outdoor (and indoor!) listening pleasure.

- Applications:**
- Audio for Luxury Homes
  - Audio at Luxury Offices
  - Hotel Banquet Halls Audio
  - Smart School Audio Sharing

**Model:** SH-480
