Door Access & Time Attendance Control System

Well known product of Slovenia, designed with complete Access Control and Time Attendance Solution based on biometric person identification. This system provides a high level of reliability based on three biometric parameters such Face Recognition, Lip Movement and Voice Recognition.

This product is an integrated system recognizing people by using multimodal biometric parameter. It has been designed and made for different uses. It used for access control, person presence tracking, time and attendance, controlling various devices and appliances etc. and also for sending and receiving video messages, for video surveillance and for video intercom.

System provides a high level of security based on face/mimic recognition and voice recognition. Based on previously saved biometric data it recognizes persons acts accordingly (creates an event with a photo of a person, opens a door, turns on a light, send an e-mail or SMS etc.) It computerized personal data management, without reliance on door locks, keypads or guards Management ease with fewer hassles.

The system also allows the use of pin codes which can be entered through the unit's of touch screen. It can be used for many applications: Corporate, Commercial, Private, Smart Houses, Clubs, Hotels, Banks etc. The system grants level based user rights, allowing for variations in access to meet any needs.

Applications:
- Fast and Efficient Security Control in Smart Airports
- Reliable Security Control in Luxury Enterprise
- Guaranteed security in of national security issues

Model: SH-498

Part #: Tab Systems Ltd - Smarti

Features

- Multimodal biometric standard in a single solution – a unique system worldwide.
- Fully interoperable the system can have multiple recognition units connected for single database.
- Allow audio video messaging, video surveillance, video intercom
- Fully customizable to meet any need.
- Fully adoptable to any environment – Corporate, Commercial, Private or Government
- Colour Touchscreen
- Unlimited connection of I/O devices to meet any need.
- Allows a high level of security and access control.
- Quick to install and set-up

Specifications

Hardware
Indoor unit: 10.4" color touchhscreen,
CCD camera : Integrated adjustable
Communication Ports: ……..
microphone, speakers, handset,
Controller: relay I/O controller
Reader: CF card
