

Rain 8x10 Sprinkler Control

You can use your X10 System to Save Water and Keep Your Lawn Green. Rain8 designed for installation in a water-protected location or in a weatherproof enclosure.

Integrate sprinkler or watering system control into your X10 home automation system with the Rain8, a full-featured, 8-zone irrigation controller that accepts and reacts to standard X10 commands. This opens up the world of sprinkler and irrigation system control to anyone with X10 timers, remote controls, even over-the-Internet control using PC-based automation software.

Set up is easy. All you have to do is momentarily connect the Rain8 to your PC's serial port to assign the X10 address and program cycle durations for each sprinkler zone. Once the X10 address and zone cycle durations have been set, the Rain8 can be disconnected from the PC and will respond to X10 signals just like any other X10-connected device.

Model: SH-632

Part#: Smarthome 3124c

Features

- Control sprinkler zones like any other x10 connected device
- Multiple units can be networked for larger installations
- Multiple Rain8 modules can be networked together, requiring only one AC transformer and PLC interface.
- To interact with your X10 system, you'll need an X10 interface, like the Power Linc Module.
- Trigger either of two distinct program
- Configure entire sprinkler program as a single x10 address, or assign x10 address to each sprinkler zone.

Specifications

Electrical: 24-27VAC, 50 or 60 Hz
 120VAC to 24V, 300 mA, class 2 wall-mounted transformer included
 Controller Current: 30 mA
 Sprinkler Valve: Voltage: 24VAC
 Current: 250 mA max. (with supplied transformer)
 Connections: 12-place, plug-in terminal strip (Two-piece design allows user to unplug controller from sprinkler valve and power wiring)
 PC Connections: RS-232 serial port, DB9.

Dimensions

Size: 3.8" x 2.4" x 1.0"
 Weight: 4 oz.
