

## Solar Powered Address Numbers

Solar- Powered Illuminated House Numbers Provide Easy Address Visibility  
it is designed for every home.

Most house numbers are virtually impossible to see at night. Whether you're waiting for food delivery or expecting guests, clear viewing of your address is extremely helpful. With the EZView Solar Powered Address Numbers, you'll never again have to worry that service people or even emergency personnel will be able to locate your house. Using only solar energy, the numbers light up each evening and turn off at dawn, without electricity or help from you, ever.

The EZView Solar Powered Address Numbers are visible at night from over 100 feet away. Using the included mounting materials, place the numbers on your house, mailbox or fence, anywhere they'll receive the sunlight they need to charge the included batteries. These solar-powered numbers are completely weatherproof, so they'll function in rain or cold.
