

Toothbrush Sanitizer

Sanitize Four Toothbrushes Using Safe Ultraviolet Light it is convenient and even your kids will be able to use it, and since it uses no steam and no heat to clean, there's no danger of young fingers' getting burned.

If you rinse your toothbrush well after brushing and replace it every few months, you may think you're protecting yourself from the germs that this moist environment collects, but studies show that such harmful germs as streptococcus, E. coli, and salmonella can be found on the device you put in your mouth twice daily. Protect yourself and your family from harmful germs and bacteria with the VIOlight Toothbrush Sanitizer, a revolutionary device that sanitizes up to four toothbrushes with ultraviolet light while storing them in an attractive unit.

The VIOlight Toothbrush Sanitizer eliminates germs and bacteria on your toothbrush using the same ultraviolet germicidal technology used in dentists' offices and hospitals. Toothbrushes of any style and size will fit in the VIOlight Toothbrush Sanitizer, even children's and electric toothbrushes, so your entire family can take advantage of this technology.

Model: SH-636

Part#: Smarthome 92301
