

Home Smart Center for Everybody

Following the simple instructions, you can install and operate this wireless system easily.

Now, everybody can own a Skylink® AAA+™ Wireless Home Smart Center at an affordable price.

The system is expandable and can be easily customized to suit your requirements.

Additional sensors, remote controls, receivers and operating devices (e.g. door operator) can be added easily by simple programming.

Voice Cue

A human voice tells you the system status and guides you when you are programming the system. It is also available when you are calling in by phone.

Zone 1
Sensor 1
Triggered

More Secure

With Skylink Rolling Code Technology, a different wireless code is generated with each wireless transmission.

Control from Anywhere

You can check the system status, or turn on/off a wireless device when you are away from home by dialing in with a touch tone phone and user password.

Monitoring by Yourself or by Professionals

The voice dialer can call you automatically when an alarm is triggered. You can also connect the system to a monitoring station*.

* Monitoring fee may apply.

Skylink[®] Home Smart Center

Wireless & Smart Controls for Everybody

Alarm (when not at home)

When the sensor is activated in Alarm mode, it will trigger the alarm sound and the dialer to call for help.

Alert (when at home)

When the sensor is activated the control panel will alert the user to what is happening surrounding the house by human voice, cue, flashing lights and beeps.

Automation

Controls by calling in by any touch tone phone away from home or simply by the remote control, the user can enjoy the convenience of wireless home automation everywhere. Event triggered automation can be assigned.

Communicator

It is easy to check the system and sensors' status by calling in and entering a programmable user's password. Built-in dialer helps to call for help. It can notify a monitoring station by the digital dialer if a monitoring service is subscribed.

Emergency Response service

Panic transmitter is available for the elderly and physically challenged. Press once on the panic button, the built-in dialer of the control panel will automatically call for help through telephone line.
