

# experience

## true comfort

Each button has a built-in indicator light which can show the status of the appliance being controlled.

An optional built-in infrared receiver can be used with handheld remote controls like the Philips Pronto to activate up to 128 commands.

Up to 8 Scene switches can be installed in the premises for maximum convenience.

Scene switches are available in a variety of styles and colours to match any décor.

CAT 5 cable

A matching range of conventional electrical switches is available where Comfort control is not needed.

# Comfort Scene Control Switch

Comfort's designer Scene Control Switches can be placed in some or all rooms to set any scene or control any appliance or group of appliances, to open the door or gate, even to arm the security system.
