Dimensions

Size: 127x260x38(mm)

DIVA is here - the new foremost performer in the world of color video door entry systems. Born from advanced technological and design research in the Comelit Group Spa Research and Development Centre. DIVA becomes the new benchmark for the most novel concepts in video door entry systems.

The slim surround is just 3 cm in depth, like a decisive graphic line, allowing the monitor to be surface mounted yet unobtrusive. In no time at all an elegant and original desk conversion kit can transform Diva into the most stylish desk monitor. A Diva requires privacy, so a special circuit ensures the call tone can be temporarily excluded (for example, at night or during the week-end). This is not all - brightness and call volume adjustment make it easy to personalize the main functions at any time, making the monitor an integral and modern part of home comfort.

- Applications:**
- Guest and Staff Entry Management for Luxury Homes
 - Visitor Management System for Luxury Offices
 - Student and Staff Access Control System
