

IR Remote-Controlled Deadbolt - Brass

Tired of fumbling for your key when your arms are full or trying to find your door lock in the dark? No more hassles it 's time to enjoy the convenience of opening your door just like the **keyless** entry on your **car**, with the use of a **small remote** within a few seconds the **door** will **automatically open** for you.

This IR Remote-Controlled deadbolt is easy to install and program. It replaces your existing deadbolt, so there's no drilling involved. And since it's battery powered, there's no need to mess with any power cables.

This revolutionary deadbolt recognizes up to 30 remotes so you can grant access to multiple users. Remarkably easy-to-use and convenient for all ages, you'll wonder how your family ever lived without it!

The IR Remote-Controlled Deadbolt is also available in satin nickel to match your door. Each unit comes with external and internal deadbolt parts, two remote controls, and two conventional back-up keys for manual operation.

Accessories

Extra IR Remote Key Fob Blue Extra IR Remote Key Fob
