

Gate / Garage Shutter

Model: SH-576

Part #: Smarthome 7413B

Features

- Easy to install low voltage system, no electrician or welding required
- Commercial Grade Soft Start / Soft Stop feature increases life of hardware and opener
- Large control box with room for extra battery and accessories
- Works on all gates; chain link, tube, panel, ornamental, wood and vinyl
- Provides up to 115 cycles per day using transformer charger
- UL APPROVED – obstruction sensing enhances gate operation safety
- Adjustable gate activation alert and auto-close
- 12-volt battery backup (included) opens and closes the gate even during power outage

Specifications

Drive: Low friction screw drive (linear actuator) rated for -5°F to + 160 °F
 Power: 12Vdc, 7.0 Ah, sealed, rechargeable acid battery
 Motor Speed: 260 rpm - 680ft lb. torque at 12v

Tired of stopping your vehicle and manually opening/closing your gate every time you leave or come home? Simplify the process with this single-gate automatic gate opening system that lets you control your gate from the comfort of your vehicle!

This automatic gate opening system lets you control your gate from the comfort of your vehicle. Just press the entry transmitter in your car (similar to a garage door opener) and the Automatic Gate Opener will open your gate. Once you exit, you can close the gate with another press of the remote, or it will close by itself 60 seconds later — so you'll never accidentally leave it open.

- Applications:**
- Keyless Access in Luxury Home
 - Convenient Entry in Smart Hotel Rooms
 - Comfortable entry in Modern Apartments
