

## Gas (Carbon Monoxide) Detector

Our incredible product can stop false alarms with any remote control. Sounds an 85dB alarm when it senses dangerous levels of this colorless, odorless and potentially lethal gas.

The Remote-Controlled Carbon Monoxide Alarm offers the added benefit of a digital LCD screen that displays the parts-per-million level of carbon monoxide (CO) present — the information many fire departments request before investigating the carbon monoxide source. A memory feature lets you check the highest level of CO recorded during an alarm. Levels are saved, even after a power interruption, until you clear it. This feature is crucial if you plan to call someone to investigate the CO problem.

Carbon monoxide comes from flammable fuels such as natural gas, propane gas, heating oil, kerosene, coal, charcoal, gasoline or burning wood with insufficient oxygen. At low levels, it causes symptoms similar to the flu, like headaches, fatigue, nausea, dizzy spells, confusion and irritability. As levels of carbon monoxide increase, vomiting, loss of consciousness and eventually brain damage or death can result.

The International Association of Fire Chiefs (IAFC) recommends a carbon monoxide detector for every level of your home and in areas that are potential sources of this deadly gas, such as gas or oil home appliances like furnaces, clothes dryers, ranges, ovens, water heaters and space heaters. Carbon monoxide can also come from fireplaces, charcoal grills, wood-burning stoves or from a running car in an attached garage.

- Applications:**
- Safety, Security for Luxury Homes
  - Safety, Security at Luxury Offices
  - Hotel Security and investment insurance
  - Smart School Student Safety Against Unfortunate Accidents

**Model:** SH-579

**Part #:** Smarhome 7980

### Features

- Silence or test this alarm with your TV remote control
- Works with any remote — no programming necessary
- Plugs into any AC outlet, yet is backed up with a battery for constant protection

### Specifications

Power Supply: .....  
Plugs into AC outlet  
9V battery (included)  
Compatibility: .....  
Any infrared remote control  
Range:.....  
Control from up to 12 ft. away

### Dimensions

Size: 5 1/4" x 3 1/4" x 1 1/4"
