

## Home Theater Seating

Comfort range of designer scene switches allows control of any scene or appliances from any room. Curtains, Lights, Alarm, Air Conditioning and home entertainment can be controlled with an optional handheld remote.

The collection blends rich colors, the tactile luxury of quality leather and excellent craftsmanship with innovative designs, to caress the senses; our unmistakable passion for the craft, evident in every minute detail.

Choice fibres and unique textures bestow luxury at every touch, while the aroma of high quality natural leather evokes character, charm and wonder. An enchanting array of rich, lavish colors and distinctive styles come together to create the perfect ambiance to your living spaces.

And because of our tireless pursuit of quality and innovation, in 2003, we received the ISO 9001 for distinction in quality management. Then again in 2004, we passed an audit that examined our labour, social and quality compliances.

We subject our furniture to a thorough inspection at every stage and track them through to final assembly by electronically tagging each piece. They are then carefully packaged for shipment to ensure that quality is maintained and delivered on time.
