

ULTI

Few elements in our homes touch us in quite the same way as lighting. Not only can its thoughtful, creative use enhance and accent the physical aspects of one's interior design, it can also add less tangible, emotive qualities such as ambience, warmth and mood. Simply reflect on the journey of the sun each day- from dawn, through midday, and finally to sunset. It becomes apparent how lighting is indeed an essential and welcome part of our daily lives.

A Clipsal Concept

Lighting is part of life

Life pure and simple

The philosophy behind the ULTI system is simple: to let you create the lighting moods you desire in every room of your home, and to help you achieve them easily and flexibly. With ULTI, you control the atmosphere, maximising the impact of your design scheme with the minimum of fuss. Completely retrofittable, easy to programme and use, safe and reliable in operation. What could be simpler?

When the family gets together,
the perfect atmosphere can be chosen

Different effects can be instantly achieved with one touch

Enjoy a great movie in total comfort

Effects are limited only by your imagination

Dramatic effects for special features and areas in your home can be created

One-touch scene control

With just one touch, you can choose a pre-set lighting scene, giving the exact atmosphere you desire. By controlling the combinations of light groups within your home you can create scenarios that perfectly complement and enhance your interior design and functional needs. As your mood or requirements change, why not the lighting?

The Ultimate Switch

Installed in hours Programmed in minutes

The ULTI system is quick and easy to install. Designed to be completely retrofittable and operating with wireless transmission, no costly and troublesome rewiring is required. You just use it to replace your existing switches or install it during construction. And programming couldn't be easier: just set the remote and switches to Programme Mode, adjust the lighting scene, set it and you're done. The one remote unit can control almost infinite switches, along with the lighting scenarios individually created by you.

Simple to use

At the heart of the ULTI system lies the principle of operation simplicity. The elegant remote control unit does everything at the push of a button. This unit is ergonomically designed to fit snugly into your hand; its use of wireless transmission means you can operate it from any angle. Along with other convenient features of our system such as sensible backlit buttons, master dimming, all-off function and our signature light rings on the switches, ULTI is designed with your needs in mind.

Flexible and expandable

As your needs or tastes change, so can the ULTI system. You can change lighting scenes, add more lights, switches and dimmers as your requirements expand. Moreover, the flexibility of ULTI means it can also accommodate many types of electrical device. And ULTI is just as comfortable in the office for those vital and demanding commercial applications.

Your choice

To complement your decor, you can choose the colour and shade you desire from our current offerings, including crystal glass, champagne-gold, brushed-silver and pearl-white finishes. In the near future we will also be offering a wide range of materials and finishes such as metal, wood and leather - even wallpaper. For more unique and creative designs, ULTI also provides a "made-to-order" service to even further expand your design options.

Standard Offerings

Made-to-order

And many more...

**Simple on the surface
Advanced technology within**

ULTI uses a 315 MHz radio frequency, enabling it to cover a very large area. To make ULTI completely retrofittable, we developed a patent-pending proprietary protocol that enables reliable data transmission and requires low power consumption. The retrofittable technology of the ULTI system is a complete design breakthrough. Each handheld remote has a unique identification code that helps to avoid interference. And for your peace of mind, auto-load failure detection and an override switch provide extra safety to all users.

Everything you need

To support and enhance your chosen lighting system, ULTI makes a full range of products and accessories. Their application is limited only by imagination.

Product Range

1-gang 10A High Power on-off Switch

2-gang 2x5A High power on-off Switch

4-gang 4x200W Low Power on-off Switch

Switches

- 1-gang 10A High Power on-off Switch
- 2-gang 2x5A High Power on-off Switch
- 1-gang 800W Low Power on-off Switch
- 2-gang 2x400W Low Power on-off Switch
- 4-gang 4x200W Low Power on-off Switch
- 3-gang 3x250W Low Power on-off Switch
- 1-gang 20A Double Pole Switch
- 5A Curtain Control Switch

1-gang 400W Dimmer

2-gang 2x200W Dimmer

Dimmers

- 1-gang 400W Dimmer
- 2-gang 2x200W Dimmer
- 1-gang 800W Dimmer in Twin-gang box
- 2-gang 2x400W Dimmer in Twin-gang box
- 3-gang 3x200W Dimmer in Twin-gang box
- 1-gang 600W non-EMC Dimmer
- 2-gang 2x300W non-EMC Dimmer
- 1-gang 1200W non-EMC Dimmer in Twin-gang box
- 2-gang 2x600W non-EMC Dimmer in Twin-gang box
- 3-gang 3x400W non-EMC Dimmer in Twin-gang box

Product Range

Wall Extension Units

400W In-line Floor Dimmer
13A Plug-in Switched Socket

400W In-line Floor Dimmer
