

Z. SERIES ACCESS

**Attractive and intelligent....
finally, a keypad that is
easier to use than your
original equipment's
remote.**

ACCESS...FOR ALL SOURCE EQUIPMENT

Regardless of whether you have a simple stereo receiver or an intricate multi-zone audio system, the Z•Pad features a design that guarantees love at first touch! Logical key placement and labeling make this keypad as easy to use as a handheld remote....and it never disappears!

Decora® insert design and easy-to-recognize molded keycaps portray a subtle, yet versatile profile that works well in any decor. Solid, tactile microswitches give instant feedback when keypad buttons are pressed. Assorted keycap options allow "customized" labeling for source and custom-programmed function keys.

FRIENDLY FEEDBACK

Press any source select key and the keypad turns on and the listening zone activates. The Z•Pad features multi-colored LED's (red/green) that give you feedback on a number of functions. It lets you know if individual sources are in the "play" mode (requires Z•630II PreAmp Controller), your listening zone is in mute/"Do Not Disturb" mode or when TV audio has been selected.

BEGIN WITH THE BASICS.....

The Z•100 Intelligent Keypad offers basic 16-key control of system and source equipment functions in an economical single-gang design. Specific macro keys power up your source equipment and then issue "disc select" and

1. RED when TV selected
2. GREEN when TV Audio detected

Z•KEY AUXILIARY KEYCAP PACKAGE AVAILABLE IN WHITE AND IVORY

“play” IR commands. The real benefit of this basic offering is one-touch access of your most favorite music. It’s that simple.

EXPAND FOR DIRECT ACCESS FUNCTION

Add the Z•150 Direct Access Keypad to expand functionality to include numerical source control features plus TV on/off control! Select tuner bands and stations by punching in a number. Get to any selection in your 200 CD disc changer—even browse satellite menus. This dynamic duo provides you with control features normally found in 3 and 4-gangkeypads (or not available at all)!

TOO SLICK!

From the Z•Pad you can expand features to include IR and audio detect functions. Add an ELAN IR receiver for reception of IR commands from a handheld remote. Enjoy local source sound through in-wall speakers with the Z•025 Audio Sensing Module.

“MACRO” ECONOMICS

Multi-function key programming or “macros” save you time and simplify your life. Each button can be programmed to perform up to 10 steps or tasks. Press a button, and instantaneously the Z•Pad will fire multiple commands off to any source, security system or automation controller.
