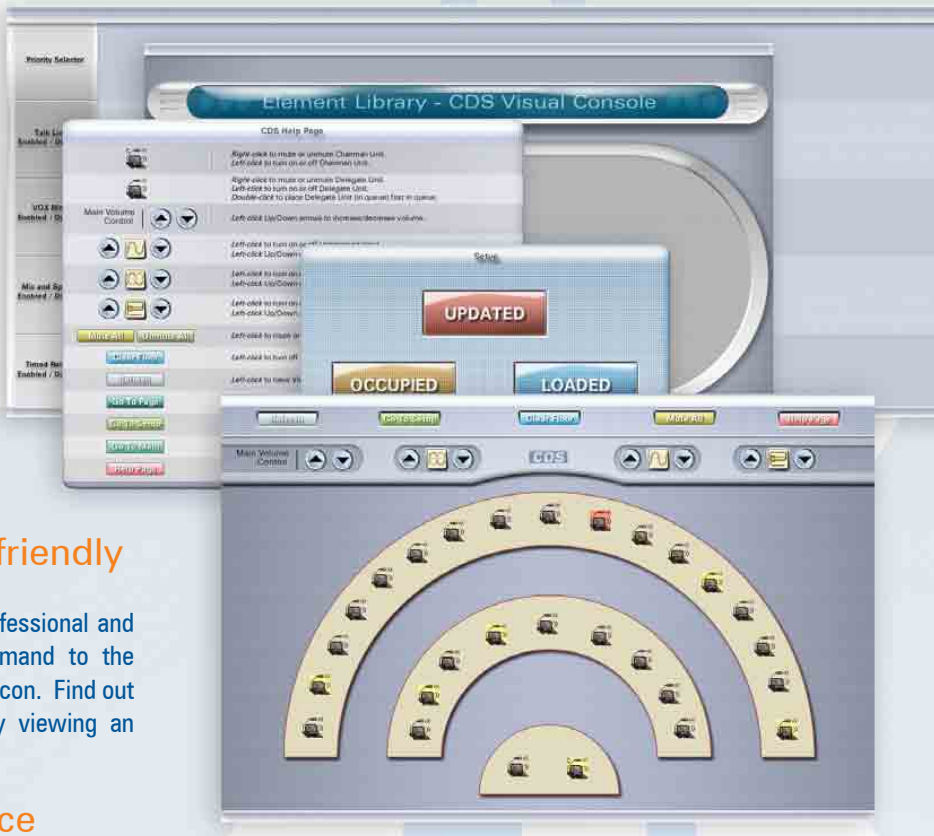
CDS Visual Console

telecor™

Discover Effective Communications Management with Visual Console for CDS

Visual Console for CDS gives you superior PC control of the Telecor CDS. The software makes managing conference activities very simple. The PC screen displays a graphic layout of the conference floor. With the click of an icon, you have complete control of the conference proceeding.



Professional and User-friendly Interface

Visual Console for CDS provides a professional and user-friendly interface. Send a command to the Telecor CDS with the single-click of an icon. Find out the status of the conference floor by viewing an icon's colour.

Multiple Screen Interface

You can also navigate to other screens by clicking on an icon. Each screen has a unique purpose:

A **Main Screen** provides you with the most frequently used icons.

A **Setup Screen** allows you to choose a particular conference setup.

A **Configuration Screen** allows you to control the operational aspects of the Telecor CDS.

A **Help Screen** provides you with a quick and easy-to-understand reference of what an icon is used for.

Software that Gives You Flexibility and Control

Whether it is designing an interface or customizing system operation, *Visual Console for CDS* provides you with the tools to create the best interface for your conference application.

Designing a Unique Interface

In Visual Console for CDS, you can create a graphical representation of the conference floor that is unique to your conference application. The software provides you with several templates that cater to a variety of conference settings. You have the option of modifying a template in many ways.

Visual Console

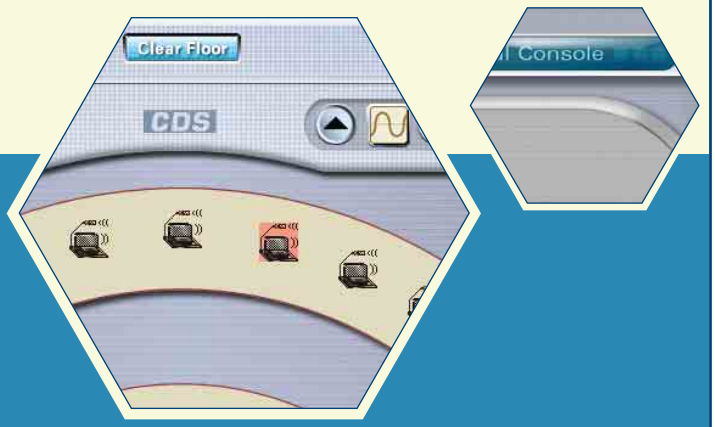
Meeting the Requirements of Your Conference Application

In Visual Console for CDS, you can configure the operational aspects of the Telecor CDS to accommodate the needs of your conference application. For example, enable or disable specific CDS features, or set priority levels for Floor Units. The software allows you to customize up to 6 conference setups.

Password-Protecting Your Work

Once you have completed an interface, your work can be password-protected to prevent other users from modifying it.

- Create a graphic layout of the conference floor for the background or select a Telecor background.
- Give each screen a distinct title.
- Add, duplicate, or delete icons.
- Position icons anywhere on the screen.
- Label icons to indicate exactly what they do.
- Change the appearance of an icon label by selecting a border, font, colour, or size.



A Practical Solution for any Conference Setting

The combination of PC Control and a customizable interface makes Visual Console for CDS the ideal solution for any conference setting.
